

CONTENTS

PREFACE **v**

CHAPTER 1: GETTING STARTED **1**

Andrew Northedge and Andrew Lane

- 1 The first step of the journey 1
- 2 Why read about studying? 4
- 3 How to get yourself organized 8
- 4 What is studying all about? 15

CHAPTER 2: READING AND MAKING NOTES **24**

Andrew Northedge and Alice Peasgood

- 1 Getting into some reading 24
- 2 Reactions to reading 26
- 3 Reading strategically 35
- 4 Remembering what you read 41
- 5 Making notes 44

CHAPTER 3: WORKING WITH DIAGRAMS **56**

Andrew Lane

- 1 About this chapter 56
- 2 Seeing the world 56
- 3 Thinking through diagrams 64
- 4 Communicating through diagrams 81
- 5 Where do you go from here? 86

CHAPTER 4: LEARNING AND USING MATHEMATICS **87**

Hilary Holmes and Frank van der Molen

- 1 Introduction 87
- 2 Reading maths 90
- 3 Practising maths 97
- 4 Tackling mathematical problems 104
- 5 Expressing yourself mathematically 112

CHAPTER 5: WORKING WITH NUMBERS AND SYMBOLS **118**

Alice Peasgood

1	Introduction: learning the language	118
2	Getting used to numbers and symbols	119
3	Developing good numerical habits	131
4	Working with units	137
5	Numbers in tables	147
6	Where next with mathematics?	153

CHAPTER 6: DIFFERENT WAYS OF STUDYING **155**

Andrew Northedge

1	The diversity of study today	155
2	Learning with other people	158
3	Learning by listening and watching	167
4	Learning by doing	175
5	A reflective mixing of modes	179

CHAPTER 7: STUDYING WITH A COMPUTER **181**

Andrew Northedge

1	A basic study tool	181
2	Becoming more efficient	182
3	New ways of studying	190
4	Problems with computers	195

CHAPTER 8: OBSERVING AND EXPERIMENTING

Jeff Thomas and Andrew Northedge **199**

1	How can you spot a scientist?	201
2	Observing	204
3	Experimenting	212
4	Experimenting 'for real'	228

CHAPTER 9: WRITING AND ASSIGNMENTS **228**

Jeff Thomas

1	Introduction	228
2	Different modes of science writing	229
3	Some basic ground rules	232

4	Using scientific vocabulary	240
5	Putting it all together	242
6	Managing assignments	259
7	The importance of practice	269

CHAPTER 10 TACKLING EXAMINATIONS **270**

Andrew Lane and Andrew Northedge

1	Why do we have exams?	270
2	What types of question will you meet?	272
3	Some myths about exams	275
4	What examiners like to see in exam scripts	279
5	Revising for exams	283
6	Getting yourself 'geared up' in the last day or two	291
7	Working out your tactical plan for the exam	293
8	Will you do as well as you ought to in the exam?	300
